

Job Opening – Integration Engineer & Software Developer in Testing

Vector is a fund administrator and technology company that services closed-end investment funds, primarily in the venture, private equity, real estate and digital asset spaces. We provide alternative asset managers with solutions for fund accounting and reporting, operational support and investor relations. We are currently developing what we believe is the most exciting software roadmap in the industry in an effort to streamline the experience of all stakeholders in alternative investments, including our employees.

Our company is a place where excellent talent can thrive. We offer work that is progressive and fulfilling. And we are hyper-focused on workflow engineering, so you can spend your time on tasks that matter to you. We offer competitive salaries, industry-leading benefits packages, including unlimited PTO, and incentive compensation packages that are unmatched in the industry.

Job Description

The **Integration Engineer & Software Developer in Testing** role is instrumental to Vector's success. At a minimum the responsibilities will include:

- Integrate code developed by other parties into our testing, staging and live environment.
 - Strong skills in AWS and AWS production specially, EC2, load balance, Lambda and S3.
 - Can provision all via script/command line.
 - Can setup and configure CI/CD.
 - Familiar with Git
- Support backup and disaster recovery on AWS.
- Develop a Testing Framework (code coverage, unit tests, etc.).
 - Familiar with PHP, Laravel and MySQL (*Not a requirement to have vast development experience, but more from a general understanding, as the position doesn't require developing code that is used in the live environment.*)
 - Basic understanding of JavaScript and Svelte.
- Collaborate with internal teams and back-end teams.
- Highly motivated with a passion for creating and supporting great products.

Job Location

This is a remote position. You can work from home, or we will cover the cost of a co-working space in your area.

Qualifications

You must satisfy one of these requirements:

VECTOR

447 Sutter St., Ste. 405
San Francisco, CA 94108

- Bachelor's degree in Computer Science, Computer Engineering or a related field, and 2+ years professional experience with Testing Frameworks, Laravel and Git, and 1+ years of experience with Svelte.

-OR-

- 5+ years professional experience with Testing Frameworks, Laravel and Git, and 3+ years of experience with Svelte.

-AND-

- Strong, independent self-starter, as well as collaborative problem solver.
- Demonstrated team player.
- Strong written, verbal and interpersonal communication skills.
- Willingness to learn, a can-do attitude and motivated to succeed and grow.

As an early-stage company, Vector provides no shortage of special projects and new opportunities for growth, so the ideal candidate is ambitious, eager to grow and a team player. We want all of our employees to be invested in and rewarded by the success of the company. Our standards of practice are high and we respect each other's time.

Applicants should submit their resume to humanresources@vectorais.com.

EEOC: Vector offers equal employment opportunity to all, regardless of their race, creed, religion, gender, age, sexual orientation, national origin, disability, veteran status or any other characteristic protected by state, federal, or local law.
